Tex-OBL

Tex-OBL (Overall Built-In Length)

250# Oil Suction & Discharge Hose Assembly

An exclusive 250psi Dock hose assembly with built-in Flanges, ideal for marine and industrial applications requiring the transfer of petroleum fluids containing up to 55% aromatics.

The hose assembly features an integral bonding of metal end fittings to rubber, forming a complete engineered hose system.

Features & Benefits

- The rubber hose construction includes an oil resistant tube with a steel wire helix and fabric reinforcement, and a special blended neoprene cover.
- The smooth bore Oil Suction & Discharge hose assembly consists of built-in ANSI rated 150# Carbon Steel nipples with a Fixed by Floating Flange configuration.
- The Tex-OBL is hydro-tested at the factory to 1.5 times working pressure and includes test certificate.
- Reliability and enhanced fire resistant cover add to the performance and safety aspects of the hose.
- Flange configuration makes it easy to connect to existing manifolds and flanges including over the water connections.
- Stocking sizes from 4" through 12" are available for immediate delivery.
- Meets USCG and RMA Class II requirements.

Technical Data

Part Number	OBL
Construction	Type "F"
Tube	Black Nitrile, 55% aromatics (ORS)
Cover	Black Neoprene/SBR Blend
Reinforcement	High tensile tire cord plies, Helix wire
Temperature	-40°F to +190°F
Safety Factor	4:1
Burst Pressure	1,000 psi
Branding	OIL SUCTION AND DISCHARGE – 250 psi WP MEETS USCG 33CFR 154.500 (Red layline with black letters)
Specifications	Meets USCG and RMA Class II requirements
USCG Certified	Tested according to USCG Certification requirements
Couplings	ANSI 150# carbon steel built-in fixed by floating flanges

ANSI Flanges	Assembly Measurements (in. x ft.)	Working Pressure (ft.)	Bend Radius (in.)	Weight/ Each (lbs.)
