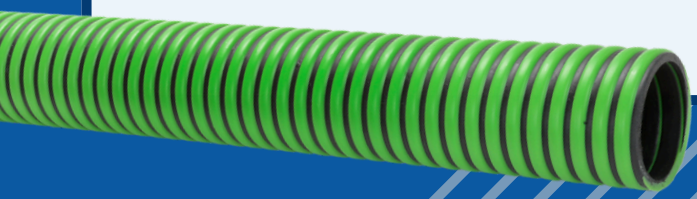
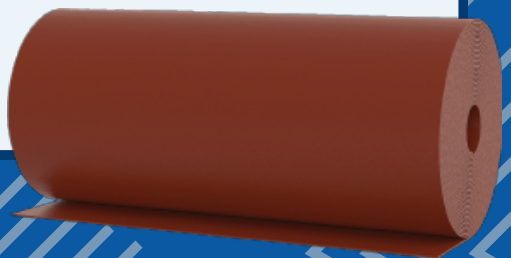
HOSE Safety Awareness Month

TEXCEL®

SAFETY CHECKLIST




- [x] Inspect hoses regularly for cuts, cracks, abrasions, kinks, or leaks
- [x] Verify correct pressure, temperature ratings and bend radius
- [x] Check fittings, couplings, clamps, and ferrules for wear, corrosion, or damage.
- [x] Verify fittings are properly matched & secure to the correct hose
- [x] Store hose and sheet rubber products properly to prevent twisting, crushing, or UV damage
- [x] Depressurize hydraulic systems before maintenance, repair, or disconnection.
- [x] Verify hoses are routed to prevent twisting, crushing, rubbing, or excessive bending.
- [x] Follow proper lifting and handling procedures for hose assemblies and flat goods.
- [x] Keep walkways clear of hoses and materials to prevent trip hazards.
- [x] Review emergency response procedures for hose failures or fluid leaks.
